Release Notes

June 2023 Release

Table of Contents

Increased Variant Details

OrderWise Ref: 62523
Menu Option: Admin | Products | All Products | [Edit] | Product [tab]
- Full URL
- OrderWise Product ID
- Service Item
- Created At
- Updated At

Admin | Products | All Products | Variants [tab]

Status: Enhancement
Platform: Trade Portal & Layout Editor
Licensed Feature: No
Detail: Within the Product tab, the 'Full URL' field has been given a 'Copy to clipboard' button. OrderWise Product ID and Service Item fields have been added, and the Created At and Updated At fields have been updated to show a timestamp. Within the Variants tab, the Stock column has been updated to show true stock information. When clicking the SKU link under the Variants tab, a modal will be opened which shows more variant information.

Sync Material Group Code from OrderWise for Valero Checkout

OrderWise Ref: 62987
Menu Option: Admin | Modules | Valero SAP Integration | [Settings]
- General [tab] | Material Group Default Value
- Variant Sync [tab] | Material Group Variant Character Analysis Field

Status: New Development
Platform: Trade Portal & Layout Editor
Licensed Feature: Yes (Valero SAP Integration)
Detail: The value set in the 'Material Group Default Value' field will be used for the material group code during Valero checkout, unless a value is synced from OrderWise using the 'Material Group Variant Character Analysis Field' drop-down menu.

Sync Account Only Permissions from Contact Analysis Field

OrderWise Ref: 62607
Menu Option: Admin | Settings | Customers | Permissions [tab]
- Account Only Contact Analysis Field

Status: Enhancement
Platform: Trade Portal & Layout Editor
Licensed Feature: No
Detail: With the above analysis field set up and synced against a contact, they will have the `Account Only` role assigned to them automatically and the Account Manager will not be able to change it.

Variant Option Data Sent to Valero Checkout

OrderWise Ref: 63043
Menu Option: N/A
Status: New Development
Platform: Trade Portal & Layout Editor
Licensed Feature: Yes (Valero SAP Integration)
Detail: When completing a Valero checkout, variant option data is sent including values for custom options.

Delivery Method Identifier Tools

OrderWise Ref: 62524
Menu Option: Admin | Utilities | Delivery Method Identifier
                       • Delivery Address
Status: Enhancement
Platform: Trade Portal & Layout Editor
Licensed Feature: No
Detail: A Delivery Address drop-down menu has been added to the Delivery Method Identifier to pull delivery address details from Customer records. Once selected, this will pre-populate the postcode. When the Type field is set to 'Order', the Delivery Address field will no longer be available.
